STERIL-PEEL*

Leading the **pack** in premium
quality sterilization packaging

GS MEDICAL PACKAGING INC.

Expertise through experience

Throughout our history our single-minded focus has been medical packaging of the highest quality. We have developed an understanding of the importance of product performance as it relates to sterilization. We continue to ensure that all aspects of the design and manufacturing process take into account the critical nature of the product we are producing, and the satisfaction of the end-user.

Wide range of products to meet expanding demand

GS Medical Packaging's product range continues to expand as the demands of the market we serve evolve. With our flexible machine capability, virtually any flexible packaging requirement is within our scope. Our most common product offerings are paper/film and Tyvek*/film pouches and rolls, film as well as paper/foil/poly products. So if you have a need for sterilizable packaging, you can be sure we will provide you a quality solution.

Meeting and exceeding regulatory requirements

Today's health care environment demands total commitment to quality systems and GS Medical Packaging is continuously improving its activities to meet those demands. Since its inception, the company has operated under Good Manufacturing Practices and has been audited and approved under ISO 13485. Our products also meet ISO 11607 and EN868 requirements.

Over 25 years of high quality medical packaging

GS Medical Packaging was started in 1986 and has, over the past 25 years, established itself as a reliable source for high quality medical packaging. The company has gained a reputation for meeting the stringent requirements of a variety of clients from hospitals to dental clinics to tattoo shops and nail salons, as well as medical device companies.

Today, we have a fully integrated operation with printing and lamination capability, as well as state-of-the-art pouch and roll machines.

GS MEDICAL PACKAGING INC.

STERIL-PEEL® The gold standard of sterilization packaging

STERIL-PEEL® Sterilization Packaging has been a trusted name in the medical community for more than forty years. GS Medical Packaging continues to manufacture STERIL-PEEL® products to the same high standard and continues to offer consistent value and quality throughout the STERIL-PEEL® range of products.

All STERIL-PEEL® products are manufactured with the same high-quality materials which ensure the most consistent performance of sealing and opening in the most demanding health-care environment.

Surgical grade materials

All STERIL-PEEL® products are manufactured from medical grade bleached kraft paper; hydrogen peroxide, rather than chlorine is used as the bleaching agent. They are made from virgin pulp, ensuring optimum consistency of the paper sheet, providing superior barrier properties.

Lead-free and medically-safe inks

STERIL-PEEL® products are printed with dual indicators which change colour in either steam or ethylene oxide. Both indicators conform with the latest ISO 11140 and EN868 regulations. The steam indicator ink will only change in the presence of all necessary parameters - saturated steam, temperature and time.

Environmentally conscious and medically safe film

The film used in the manufacture of STERIL-PEEL® is a laminate of two materials. The lamination process uses water-based adhesives to address today's environmental concerns. The polypropylene acts as a sealant layer in the laminate structure and is a multi-layer construction. This means that STERIL-PEEL® rolls and pouches can be peeled without the risk of 'fracture' of the film. The polyester layer of the laminate offers high strength, toughness and clarity to the film.

Adhesive seal provides maximum safety

STERIL-PEEL® self-sealing pouches are manufactured with a pre-fold (see diagram) to ensure ease and accuracy of pouch sealing. The adhesive tape is made of a polyester film coated with medical grade acrylic adhesive, designed for use in steam and ethylene oxide sterilizers.

All materials used in the manufacture of STERIL-PEEL® products are latex-free.

Regulatory

Steril-Peel® is registered as a 510K device (#953829) with the US Food and Drug Administration. Steril-Peel® is registered as a CE product under NL/CA01/601529

Item No.	Size ("	(mm)
ROLLS		
221432-221442	2-12 x 100'	50-305 x 31m
